Summary

Through my professional career I have acquired knowledge of the Operations and technology consulting sectors. As Head of Engineering Projects I have reached a high level in terms of cutting-edge technological development.

Solid knowledge of infrastructure architecture, applications and networks, platforms and integration of environments. Storages, NAS, VMWare OpenStack, Docker, Networking, Azure CloudServices and all the tools corresponding to a DevOps. I am a dynamic, versatile, self-taught and experienced person. in the sector for more than 12 years, managing workgroups and project management.

Experience

DevOps Engineer

Valtech

Jun 2020 - Present (1 year 3 months +)

My role is to help the team carry out practices that increase delivery frequency, improve code quality / security, and optimize CI / CD processes.

Among my responsibilities are, identify bottlenecks in the delivery and operation processes of the product, as well as working together with the team to unlock them and complement the skillset of the team of which it is part. I have strong knowledge around IaC, development pipelines, services provided by cloud providers and site reliability.

Development and scripting experience (Bash) and experience implementing large-scale cloud architectures and cloud-based container platforms (PaaS / SaaS)

Experience in container deployment automation solutions (Helm) Knowledge of cloud infrastructure (AWS, Azure, GCP, Digital Ocean) and container orchestration tools such as Kubernetes

Solid experience in container technology like Docker.

Solid experience building CI / CD pipelines and build tools (eg Bitbucket Pipelines, Jenkins, Github, npm,)

Strong knowledge of IaC (Terraform) and creation of immutable environments on demand.

IT Tech Lead

Presidency of the Argentine Nation

Dec 2013 - Aug 2021 (7 years 9 months)

Infrastructure Manager

Presidency of the Argentine Nation

Aug 2007 - Oct 2011 (4 years 3 months)

Strategic Planning of the Technical-Commercial solution

Project Manager.

New technology detector

Presentation manager and developer of product demonstrations.

Server administration (Windows Server 2003 + Active Directory. Exchange Server 2003, ISA Server).

Storage Management. HP Command View.

Implementation and Migration of platforms.

IIS 6.0 Fundamentals

Optimizing, Monitoring, and Troubleshooting IIS 6.0 Corporate
Antivirus Administration. SMS and Symantec Console. SQL Server 2000
Databases Administration
Cisco ASA Encryption Equipment Management, Catalyst 2950 Switch Configuration. Barracuda
Antispam Equipment Management.
Administration and Implementation of Servers RSA security by Tokens
Installation, configuration and technical support of Microsoft product software for Compaq servers,
Hp (Operating systems and various applications).
Implementation, configuration and troubleshooting of backup software (Backup Exec, Brighstore, Arc Serve
and Data Protector).
Definition and implementation of security policies at the user, company-client level and log analysis.
Implementation of HP WebJet Admin.
VMWARE deployment and configuration.
Implementation of Hp Blade Enclosure C7000 with Bl460c blade servers connected to EVA
Consulting and incident resolution.

Novell Network Administrator and Server Support

MetroGAS

Oct 2006 - Mar 2007 (6 months)

Novell Suse Administration, Troubleshooting Groupwise
Administration

Borders Administration

On site and on Lab support to operational problems on server equipment.

Configuration, maintenance and repair of Compaq servers, Hp

Software implementation, configuration and support of Microsoft products for Compaq servers, Hp
(Operating systems and various applications).

Installation, configuration and troubleshooting of backup software (Backup Exec, Arc Serve).

Installation, configuration and repair of backup units and libraries.

Night watch coverage

Education

Caece University

2011 - 2013

 **National Technological University**

2005 - 2010

Skills

Jenkins • Kubernetes • Linux • ITIL • Terraform • Agile Methodologies • Helm Charts • Microsoft Azure • Amazon
Web Services (AWS) • New Relic
